## **RE: South Monterey Avenue Culvert Replacement Project**

Dear Resident:

Construction of the **South Monterey Culvert Replacement Project** is tentatively expected to begin the week of February 29<sup>th</sup>, 2016. A number of preliminary construction efforts, including survey layout and staking, locating of underground utilities, installation of traffic control, and mobilization of materials and equipment will need to be completed before full construction operations are able to begin. These preliminary efforts should take approximately a week to complete, and full construction operations will follow, weather permitting.

This project consists of ditch regrading, culvert pipe and approach removal and replacement and restoration in public right-of-way on South Monterey Avenue between Washington Boulevard and Madison Street.

In order to facilitate construction operations, signs will be posted on Monterey Avenue prohibiting street parking between 7:00 am and 5:00 pm, Monday through Friday. There will be a need for temporary road closures throughout the project as equipment or materials move in and out of the site. Access to properties' driveways may also be restricted for periods of time while work is taking place in front of those particular properties. Residents will have access to their driveways overnight throughout most of the project, with the exception of several weeks' time when culvert replacement and driveway apron installations are taking place. During this time, residents will be allowed to park overnight on adjacent streets, where permitted. Rest assured, we will work with residents to keep them informed of any planned work efforts which may cause additional inconvenience.

The general contractor for this project is Swallow Construction Corporation of Downers Grove, Illinois. All questions and comments regarding this project should be directed to the Village of Villa Park Engineering Division at (630) 834-8505. We will make every attempt to keep you informed of construction progress and activities, and thank you in advance for your patience throughout the course of this project. If you have any questions or would like additional information, please do not hesitate to contact us.
